

Product Database Search

For Acquirers and Payment Providers

Confidently verify the legitimacy of dietary supplements, designer drugs, pharmaceuticals, and other healthcare products via web form search.

There are more than 50,000 problematic products in LegitScript's database. Are your merchant's products on the list?

The supplement industry is estimated at \$133 billion USD annually — and growing. But supplements are under constant scrutiny by government regulators, in the US and abroad. LegitScript reviews supplements and their associated marketing for regulatory compliance. How do you know that your supplement merchants aren't selling illegal products or ingredients, or making misleading claims?

[Search the world's largest, most comprehensive database of healthcare products.](#)

LegitScript's database contains over 110,000 products, including more than 50,000 problematic products that contain unsafe ingredients or make problematic claims. With Product Database Search you can check the status of these products and ingredients to verify whether your merchants are operating in compliance. Simply choose a flexible search plan to check and monitor supplements and other healthcare products.

[Comprehensive classifications that help you confidently assess risk.](#)

Acquirers and payment providers face regulatory risk, not only if products are violative but also if merchants are found to make misleading claims. That's why LegitScript tracks whether products are illegal (classified as "Red Flag") or are associated with misleading claims (classified as "Yellow Flag"). Product classifications can also be global or country-specific so you know what products are permissible and where.

What are Red Flag and Yellow Flag classifications?

Red Flag

Products are tainted or dangerous, contain unapproved drugs, or are sold in some intrinsically problematic manner.

Yellow Flag

Products are sometimes marketed with impermissible claims that they can cure, mitigate, treat, or prevent diseases, or they contain unsubstantiated claims that they affect the structure or function of the body.

Your Benefits

Access Data Like No Other

Confidently check whether supplement and other healthcare merchants are operating in compliance by evaluating the legitimacy of their products. LegitScript collects information from regulatory agencies worldwide and proactively identifies new products on a daily basis, ensuring you always have the most accurate and up-to-date information at your fingertips.

Self-check and Monitor

Choose a flexible product search plan to check and monitor supplements and other healthcare products on your own terms.

Get International Coverage

If your merchants are selling supplements and other healthcare products in different countries, you need data that gives you global insight. LegitScript's database is international, covering regulatory information from over 50 countries and more than 100 government agencies. Product classifications can be global or country-specific so you know what products are permissible and where.

Work With a Trusted Partner

Throughout the years, the quality and consistency of our data has earned the trust of industry-leading companies around the world. LegitScript is recommended by Visa and Mastercard, and trusted by companies including Google, Bing, Facebook, and Amazon to keep their platforms clean.
