

Website Database Search

For Acquirers and Payment Providers

Confidently verify the legitimacy of high-risk merchant websites via web form search.

LegitScript monitors millions of websites and flags those that pose a danger.

In addition to monitoring more than 2.3 million websites, LegitScript has a database of published websites that either pose a danger to public health or have been LegitScript-certified and are operating in compliance. How do you know that the merchants you are about to onboard aren't involved in illicit online activity?

Reduce risk by checking your merchant's websites to see whether they are operating in compliance or not.

Keep your portfolio clean by searching LegitScript's database of published websites to identify which high-risk merchants in the pharmaceutical, supplement, and addiction treatment spaces are operating in compliance and keep out those who aren't. With Website Database Search, you can check and verify the status of these websites on your own terms.

Websites include ones that are LegitScript-certified.

Visa and Mastercard require all pharmacy merchants, including telemedicine providers, who make card-not-present transactions to adhere to enhanced certification or review requirements. Our industry-leading Healthcare Merchant Certification program is recognized by Visa and Mastercard for this purpose. Our Addiction Treatment Provider Certification program for drug and alcohol addiction treatment is exclusively recognized by Google and Facebook.

You can be confident that merchant websites that are LegitScript-certified are operating in compliance with GBPP and BRAM requirements.

Your Benefits

Confidently Onboard

Access to LegitScript's published website database means you can confidently onboard merchants in the pharmaceutical, supplement, and addiction treatment spaces who are in compliance, and keep out those who aren't.

Reduce Risk

Reduce the risk of expensive fines by checking whether high-risk merchant websites meet LegitScript's standards for safety and legitimacy, including those who are LegitScript-certified. LegitScript is officially recognized by both Visa and Mastercard for providing certification for card-not-present pharmacy merchants and telemedicine providers.

Self-check and Monitor

Choose a flexible website search plan to check and monitor high-risk merchant websites on your own terms.

Work With a Trusted Partner

Throughout the years, the quality and consistency of our data has earned the trust of companies around the world. LegitScript and our industry-leading certification programs are recommended by Visa and Mastercard, and trusted by major payment providers.
