

# Website Database Search

For Internet, E-Commerce, and Advertising Platforms

Confidently verify the legitimacy of high-risk merchant websites via web form search.

LegitScript monitors millions of websites and flags those that pose a danger.

In addition to monitoring more than 2.3 million websites, LegitScript has a database of published websites that either pose a danger to public health or have been LegitScript-certified and are operating in compliance. How do you know that the merchants and advertisers active on your platform aren't involved in illicit online activity?

Reduce risk by checking your merchant's websites to see whether they are operating in compliance or not.

Keep your platform clean by searching LegitScript's database of published websites to identify which high-risk merchants in the pharmaceutical, supplement, and addiction treatment spaces are operating in compliance, and keep out those who aren't. With Website Database Search, you can take the first step in checking and verifying the status of these websites on your own terms.

Websites include ones that are LegitScript-certified.

LegitScript provides industry-leading certification for merchants in healthcare, telemedicine, and drug and alcohol addiction treatment. Our programs have earned the trust of regulatory authorities and companies around the world, including Visa, Mastercard, Google, Bing, and Facebook. Our Addiction Treatment Provider Certification program for drug and alcohol addiction treatment is exclusively recognized by Google and Facebook.

## Your Benefits

### Keep Customers Safe

Access to LegitScript's published website database helps you to keep your platform clean and protect customers from illicit merchants in the pharmaceutical, supplement, and addiction treatment spaces.

### Reduce Risk

Reduce the risk of expensive fines by checking whether high-risk merchant websites meet LegitScript's standards for safety and legitimacy, including those who are LegitScript-certified.

### Self-check and Monitor

Access to LegitScript data means you can take the first step in checking and verifying the status of high-risk websites on your own terms.

### Work With a Trusted Partner

Throughout the years, the quality and consistency of our data has earned the trust of industry-leading companies around the world. LegitScript is trusted by Google, Bing, Amazon, and others to keep their platforms clean.
