

Website Database Search

Confidently verify the legitimacy of high-risk merchant websites via web form search.

How do you know that the merchants you are about to onboard aren't involved in illicit online activity? In addition to monitoring more than 2.3 million websites, LegitScript has a database of published websites that either pose a danger to public health or are operating in compliance. With LegitScript's Website Database Search you can check the status of high-risk merchant websites in the pharmaceutical, supplement, and addiction treatment spaces to verify which merchants are operating in compliance — including those who are LegitScript-certified — and which are not.

Why use Website Database Search?

Confidently Onboard

Access to LegitScript's published website database means you can confidently onboard merchants in the pharmaceutical, supplement, and addiction treatment spaces who are in compliance, and keep out those who aren't.

Reduce Risk

Reduce the risk of expensive fines by checking whether high-risk merchant websites meet LegitScript's standards for safety and legitimacy, including those who are LegitScript-certified. LegitScript is officially recognized by both Visa and Mastercard for providing certification for card-not-present pharmacy merchants and telemedicine providers.

Self-check and Monitor

Choose a flexible website search plan to check and monitor high-risk merchant websites on your own terms.

Work with Trusted Data

Throughout the years, the quality and consistency of our data has earned the trust of companies around the world. LegitScript and our industry-leading certification programs are recognized by Visa and Mastercard, and trusted by major global payment service providers.

LegitScript Certification is recognized by Visa and Mastercard for pharmacy merchants who process card-not-present transactions. You can be confident that healthcare merchant websites that are LegitScript-certified are operating in compliance with GBPP and BRAM requirements.

LegitScript's website database includes merchants who have been LegitScript-certified.

Visa and Mastercard require all pharmacy merchants, including telemedicine providers, who make card-not-present transactions to adhere to enhanced certification or review requirements. LegitScript's industry-leading Healthcare Merchant Certification program is recognized by Visa and Mastercard for this purpose. Our Addiction Treatment Provider Certification program for drug and alcohol addiction treatment is exclusively recognized by Google, Bing, and Facebook. You can be confident that merchant websites that are LegitScript-certified are operating in compliance with GBPP and BRAM requirements.

Pricing

Website Lookups (Per Month)	Monthly Price
250	\$199
500	\$349
750	\$499
1,000	\$599
2,000	\$899
2,000+	Contact Us

How it Works

Simply create a user account at my.legitscript.com. Choose your **Website Database Search** plan. Once payment has been made, type a website into the website legitimacy search box. The number of searches you make is based upon your monthly lookup plan. Each month your plan resets automatically until canceled.
