

# Website Database Search

Confidently verify the legitimacy of high-risk merchant websites via web form search.

How do you know that the merchants and advertisers active on your platform aren't involved in illicit online activity? In addition to monitoring more than 2.3 million websites, LegitScript has a database of published websites that either pose a danger to public health or are operating in compliance. With LegitScript's Website Database Search you can check the status of high-risk merchant websites in the pharmaceutical, supplement, and addiction treatment spaces to verify which merchants are operating in compliance — including those who are LegitScript-certified — and which are not.

## Why use Website Database Search?

- |                               |                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Keep Visitors Safe</b>     | Access to LegitScript's published website database helps you to keep your platform clean and protect your visitors from illicit merchants and advertisers in the pharmaceutical, supplement, and addiction treatment spaces.                                                                                                                                         |
| <b>Reduce Risk</b>            | Reduce the risk of expensive fines by checking whether high-risk merchant websites meet LegitScript's standards for safety and legitimacy, including those who are LegitScript-certified. LegitScript's certification programs for healthcare merchants and drug and alcohol addiction treatment facilities are officially recognized by Google, Bing, and Facebook. |
| <b>Self-check and Monitor</b> | Choose a flexible website search plan to check and monitor high-risk merchant websites on your own terms.                                                                                                                                                                                                                                                            |
| <b>Work with Trusted Data</b> | Throughout the years, the quality and consistency of our data has earned the trust of industry-leading companies around the world. LegitScript is trusted by Google, Bing, Facebook, Amazon, and others to keep their platforms clean.                                                                                                                               |

**LegitScript  
Certification is  
recognized by the  
world's largest  
advertising and  
e-commerce  
platforms,

- And more!

## **LegitScript's website database includes merchants who have been LegitScript-certified.**

LegitScript provides industry-leading certification for pharmacy merchants, telemedicine providers, and drug and alcohol addiction treatment facilities. Our certification programs have earned the trust of regulatory authorities and companies around the world, including Visa, Mastercard, Google, and Bing. LegitScript's Addiction Treatment Certification program for drug and alcohol addiction treatment providers is exclusively recognized by Google, Bing, and Facebook.

## **Pricing**

<b>Website Lookups (Per Month)</b>	<b>Monthly Price</b>
250	\$199
500	\$349
750	\$499
1,000	\$599
2,000	\$899
2,000+	Contact Us

## **How it Works**

Simply create a user account at **my.legitscript.com**. Choose your **Website Database Search** plan. Once payment has been made, type a website into the website legitimacy search box. The number of searches you make is based upon your monthly lookup plan. Each month your plan resets automatically until canceled.
